CS361: Sprint 1 Assignment: Software Requirements Specification (SRS)

Overview

Begin writing an SRS for your project. There are several SRS examples linked toward the end of the Sprint 1 reading.

Instructions

Write an SRS that includes these sections:

1. Name of your project
2. Your name
3. Purpose (what the document is for)
4. Scope (brief description of the software and what it's for)
5. Functional Requirements
 - At least five user stories
 - Must follow the "As a..." format
 - Each requirement must reflect INVEST (see reading)
6. Non-Functional Requirements
 - At least three
 - Must be justified
 - Label each with a quality attribute
 - Each requirement must reflect characteristics of good requirements (see reading)

We'll come back to this SRS later once you have more information from your client.
